

Golf Trip Manager System Test Plan

This document defines the recommended end-to-end system test process for the Golf Trip Manager application. The goal is to validate operational correctness, workflow readiness, state enforcement, scoring accuracy, tournament processing, and reporting behavior across realistic golf-trip scenarios.

1. Environment / Seed Validation

#	Test Item	Result	Notes
1.	Application starts cleanly with no backend exceptions.	Pass / Fail	
2.	Database migrations complete successfully.	Pass / Fail	
3.	Trips, players, courses, tees, and score history load correctly.	Pass / Fail	
4.	Women's tees and combo tees display correctly.	Pass / Fail	
5.	No console/network errors during page navigation.	Pass / Fail	

2. Trip Creation & Planning

#	Test Item	Result	Notes
1.	Create a new trip with configurable number of rounds.	Pass / Fail	
2.	Verify trip dates and round dates validation.	Pass / Fail	
3.	Assign formats to each round.	Pass / Fail	
4.	Verify planned rounds remain visible after trip start.	Pass / Fail	
5.	Verify readiness panel updates correctly.	Pass / Fail	

3. Start Trip Readiness

#	Test Item	Result	Notes
1.	Attempt to start trip with missing setup items.	Pass / Fail	
2.	Verify readiness errors block start.	Pass / Fail	
3.	Resolve readiness issues and verify trip can start.	Pass / Fail	

4.	Verify rounds, scorecards, and round tee structures are generated.	Pass / Fail	
----	--	-------------	--

4. Team / Group Assignment

#	Test Item	Result	Notes
1.	Generate standard groups.	Pass / Fail	
2.	Generate scramble teams using seeded logic.	Pass / Fail	
3.	Verify serpentine seeding behavior.	Pass / Fail	
4.	Verify split #1/#10 starting holes.	Pass / Fail	
5.	Verify tee time interval generation.	Pass / Fail	
6.	Verify Continue to Scoring remains disabled until assignments complete.	Pass / Fail	

5. Tee Assignment & Mixed Gender Validation

#	Test Item	Result	Notes
1.	Verify men's default tee behavior.	Pass / Fail	
2.	Verify women's default tee selector appears only when female golfers exist.	Pass / Fail	
3.	Verify Apply Defaults assigns correct tees by gender.	Pass / Fail	
4.	Verify player-level tee overrides.	Pass / Fail	
5.	Verify scoring and handicaps recalculate after tee changes.	Pass / Fail	

6. Round Scoring Validation

#	Test Item	Result	Notes
1.	Enter hole-by-hole scores.	Pass / Fail	
2.	Verify gross, adjusted gross, and net calculations.	Pass / Fail	
3.	Verify live totals update correctly.	Pass / Fail	
4.	Verify finalized rounds become read-only.	Pass / Fail	
5.	Verify correction flow works after finalization.	Pass / Fail	

7. Scramble Validation

#	Test Item	Result	Notes
1.	Verify scramble setup persistence.	Pass / Fail	
2.	Verify team seeding source rounds.	Pass / Fail	
3.	Verify hole-by-hole scramble scoring mode.	Pass / Fail	
4.	Verify single total scramble scoring mode.	Pass / Fail	
5.	Verify scramble results and standings calculations.	Pass / Fail	

8. Tournament & Prize Validation

#	Test Item	Result	Notes
1.	Verify configurable tournament included rounds.	Pass / Fail	
2.	Verify standings recalculate after corrections.	Pass / Fail	
3.	Verify payout allocation totals.	Pass / Fail	
4.	Verify incomplete prize allocation warnings.	Pass / Fail	
5.	Verify locked trips are read-only.	Pass / Fail	

9. Locking / State Enforcement

#	Test Item	Result	Notes
1.	Verify finalized rounds block regrouping.	Pass / Fail	
2.	Verify locked trips block mutations.	Pass / Fail	
3.	Verify invalid actions are hidden or disabled.	Pass / Fail	
4.	Verify backend rejects deep-link or direct API mutation attempts.	Pass / Fail	

10. Reporting / Print Validation

#	Test Item	Result	Notes
1.	Verify scorecards render correctly.	Pass / Fail	
2.	Verify standings print formatting.	Pass / Fail	

3.	Verify scramble reports.	Pass / Fail	
4.	Verify tee sheets with split starts.	Pass / Fail	
5.	Verify mobile/tablet rendering where applicable.	Pass / Fail	

Recommended test scenarios: 16-player all-male trip Mixed-gender trip with women's tees 20-player scramble trip
Rain-shortened or variable-round trip Locked historical trip validation
